# Intelligent Milk Maker

App remote control: one-button brewing milk powder

Daily APP records of feeding data and growth curve

Super cyclone high temperature cleaning technology

Automatic UV sterilization and air drying technology

When not working, the intelligent milk machine can automatically cruise and sterilize every 2 hours for half an hour to keep the healthy environment.

It can be used for several days after filled with milk powder, and adopts the space cabin isolation technology to avoid the milk powder from getting wet and deteriorated.

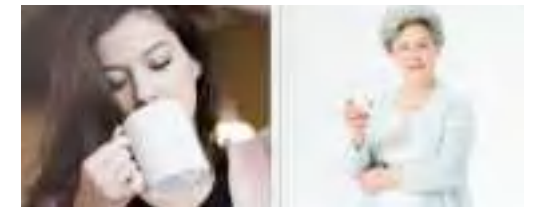

One machine for multiple purposes

Adult milk powder

Baby milk powder

Instant coffee

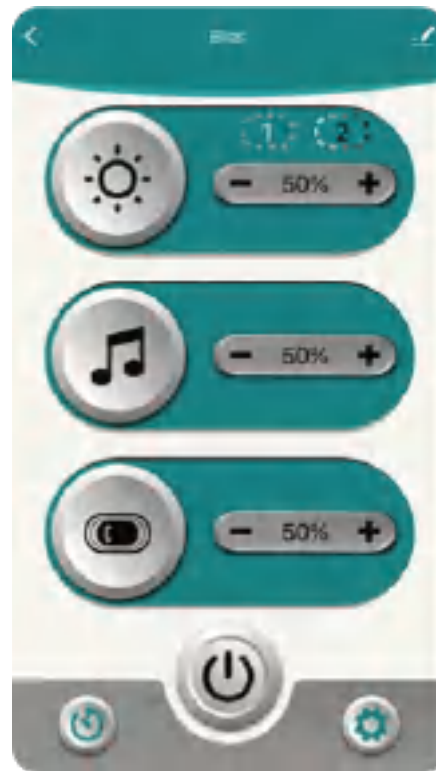

Elderly milk powder

# Smart Bassinet

The Smart Bassinet is an infant bed that helps your baby fall asleep while keeping your hands free.

You can control these functions by using the control pad
