Cooking Product Solutions | Cloud Recipe Backend

- Use the recipe background for free, flexible entry of recipes

- 31 languages available

- Once the cloud recipe is opened, numerous OEM devices have access to it.

- Enter content and the page in public version is displayed in the App instantly

- Banner management, new device operation and new recipe transmitted to user without cost

- Nutrients analysis and record the nutritions you have taken into your stomach.

Cooking Product Solutions | Kitchen Appliance App

- Support tourist mode, view recipes without registration on the App

- Banner advertising space (B-end operation content, for example, recommend a new device）

- Show recommended new recipes on the homepage, to increase the utilization rate of new recipes

- Update continues...

For customers of kitchen appliance brands, place **Recipe** on the App homepage, which not only strengthens App characteristics and personality of kitchen appliances for brand customers, but enhances user's experience on recipes.
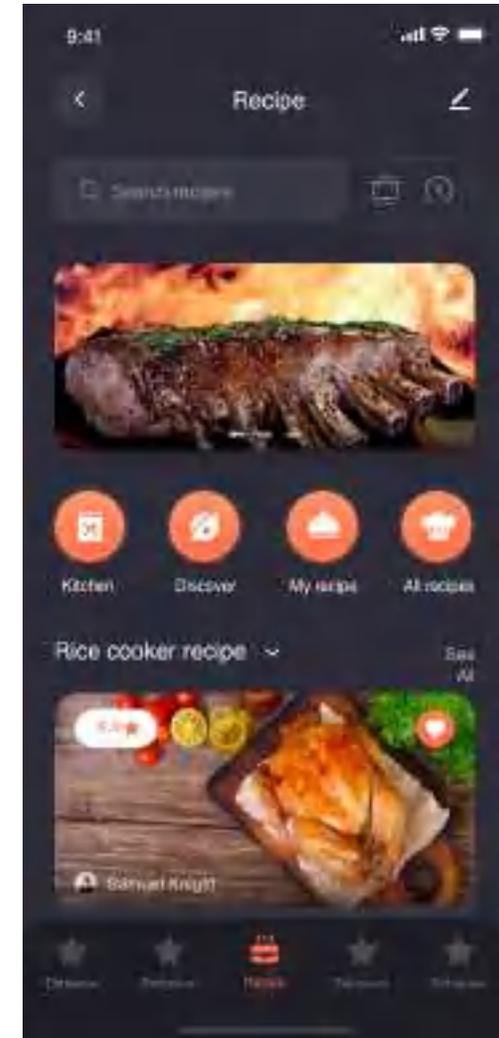

Air Fryer

Highlights

- Recipe storage: Support 31 multi-language, cloud storage recipes

- Recipe upload: Support upload customized recipe

- Recipe operation: Support cloud recipe one-key/step-by-step cooking

- General advantages: App control, UI failure warning, App message push, intelligent scene linkage, cloud timing control

- Voice control: Support Amazon Alexa andGoogle Assistant
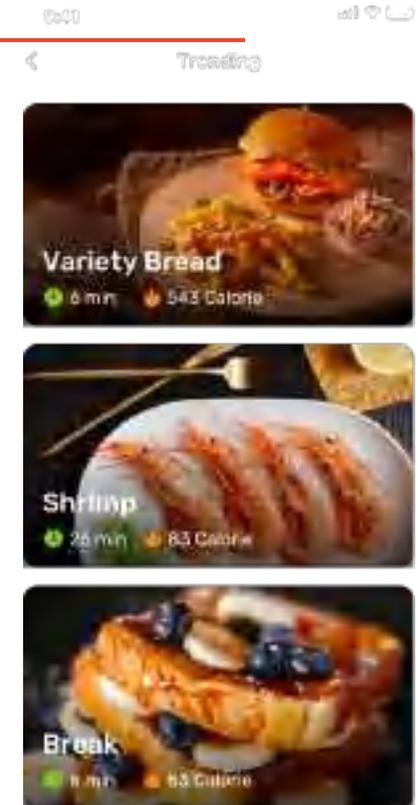

Sous Vide

Highlights

- Recipe view: Support to view cloud recipes

- Recipe operation: Support step-by-step cooking

- History record: Support for query of cooking history

- Message reminder: Once cooking completed, push a message reminder

- General advantages: App control, UI failure warning, App message push, intelligent scene linkage, and cloud timing control
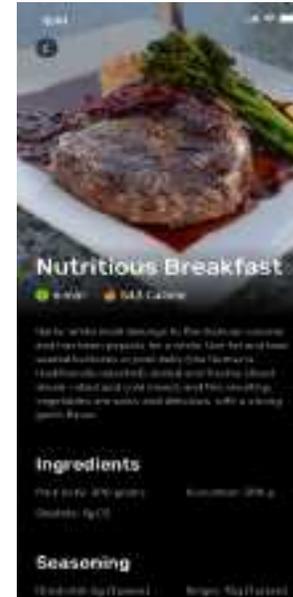

Product name : Slow cooking stick
Product model : MW-1710W3

Product name : Slow cooking stick
Product model : MW-1710W2

Product name : Slow cooking stick
Product model : MW-1710W

Electric Kettle

Highlights

- Preset boiling water: Support preset boiling water function

- Kettle status: support real-time query of kettle working status

- Heat preservation function: support a variety of heat preservation modes for different scenarios

- General advantages: App control, UI failure warning, App message push, intelligent scene linkage and cloud timing control

- Voice control: Support Alexa, Google, Jingdong Dingdong, and Tencent voice control
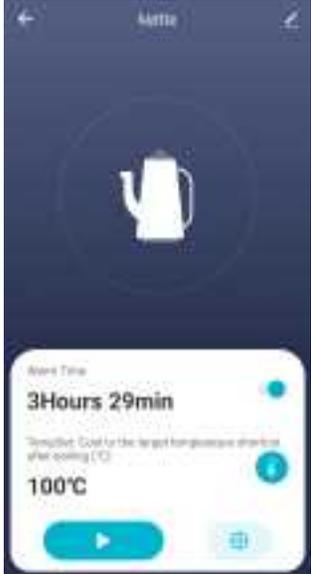

Product name: Electric kettle
Product model: KG-1528E

Product name: Electric kettle
Product model: T-9017C

Product name: Electric kettle
Product model: T-602C

Coffee Maker

Highlights

- Intelligent voice: Support voice control of the number of cups and query of working status, etc.

- Working status: Support real-time query of working status of device

- General advantages: App control, UI failure warning, App message push, intelligent scene linkage, and cloud timing control

- Voice control: Support Amazon Alexa and Google Assistant

Product name: Coffee maker
Product model: AX-WF188

Product name: Coffee maker
Product model: AX-WF187

Product name: Coffee maker

Food Probe

Highlights

- Support 1 to 8 probes

- Temperature and timing reminder through App, to enjoy food in time

- Real-time and remote monitoring of temperature and master temperature changes

- Cooking records and favorites, recording user preferences

- Preset cooking food scenes, support customized food cooking
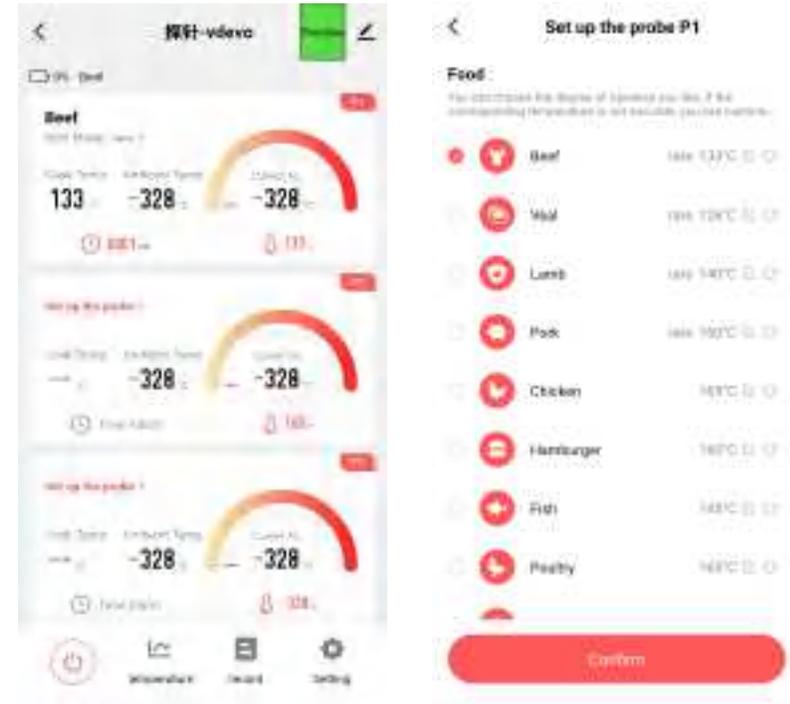

Kitchen Machine

Highlights

- Support intelligent operation screen/Android system, and functions such as steam, fry, stew, boil, fry, knead, blend, ferment, etc.

- Provide IoToS SDK (Andriod version) (suitable for self-networking devices with screens)

- Provide SDK of WeChat Mini Program

- Cloud recipes managed by background, B-end easily manages cloud recipes

- Cloud recipes support one-key/multi-step execution, and cooking parameters sent directly to a device for execution

- Recipe search, cooking history, favorites, App customized recipes upload, etc.
